

## New Cummins® B & C Series Long Blocks

Reliance Power Parts is pleased to announce new long blocks for the Cummins 3.9, 5.9 and 8.3 liter engines. These long blocks are 100% new and are sold outright - no core needed. The B and C series engines are used in many different applications ranging from light trucks to a wide variety of agricultural, industrial, and marine applications.

Reliance long blocks are currently available in the 2 valves per cylinder head version, with individual valve covers for each cylinder (late models utilize 4 valves per cylinder and a single valve cover.)

Each long block is built from the bare block up using all new Reliance parts specific to your customer's application. All specifications and tolerances are checked and verified throughout the build process. With a quick turn around time, these engines will spend less time out of commission and more time working - right where they need to be. Warranty coverage is 1 year or 2,000 hours / 50,000 miles, whichever comes first, from date of invoice on the long block only. Labor is not included.

We are also offering a do-it-yourself long block kit. These kits include all the new parts and components needed to assemble a complete long block. Now you have the option of building the long block yourself or receiving one already assembled.

When you demand flexibility and convenience, ordering a long block from Reliance guarantees you will receive all new components without the hassle of a core return.

### **Cummins Long Block Assemblies (All models are 2-valves per cylinder)**

RP1334	Long block assembly, 4B3.9
RP1335	Long block assembly, 6B5.9
RP1336	Long block assembly, 6C8.3 (single thermostat)
RP1337	Long block assembly, 6C8.3 (dual thermostat)

### **Cummins Long Block Kits (All models are 2-valves per cylinder, assembly required)**

RP1338	Long block kit, 4B3.9
RP1339	Long block kit, 6B5.9
RP1340	Long block kit, 6C8.3 (single thermostat)
RP1341	Long block kit, 6C8.3 (dual thermostat)
