John Deere® 300 Series Connecting Rod Capscrews.

Several of the John Deere 300 Series engines may require a different connecting rod cap screw than is supplied in Reliance Inframe and Major Overhaul kits. The following kits are supplied with NR80033 connecting rod cap screws for use in connecting rods marked R80032, R80034, and R113612.

ENGINE MODEL	RELIANCE PART NUMBER
3-179D, T, A	RP235, RP238, RP823, RP832, RP241, RP244, RP835, RP838
4-239D, T, A	RP236, RP239, RP830, RP833, RP242, RP245, RP836, RP839
6-359D, T, A	RP237, RP240, RP831, RP834, RP243, RP246, RP837, RP840

If your customer has connecting rods with marking number R58979 or R51727 from one of the above engines, they will require NR74194 connecting rod cap screws which are available separately.

Make sure your customer provides their connecting rod marking number prior to ordering and please add notes on these part numbers to your systems.
