

New Hyper Pistons for John Deere® 6076 & 6081 Engines.

Reliance Power Parts is pleased to announce the availability of two new pistons for the John Deere 6076 and 6081 engines. They are available for cylinder kits and complete engine kits and feature a hard anodized crown and phosphate coated skirt. Although these new pistons are not hypereutectic, the hardened crown and coated skirt do add structural integrity and long life enhancement. These additional pistons fit the same machine applications as our current 6076 and 6081 engines as well as being dimensionally equivalent to our current high ring NRE60294 and high compression NRE64509 cylinder kits. Be sure to include them with your next stock order.
