Notice Regarding John Deere NRE507076 Lube Oil Pump.

This Bulletin is for the catalog correction on the lube oil pump NRE507076. This lube oil pump will not fit the 6076 John Deere engine from serial number 499,999 and up. If you have an engine in this serial number range, please take a look at the rear backing plate to be sure you order the correct pump. The lube pump looks the same except for the oil discharge port on the back of the pump and the backing plates will not interchange.
