

Inframe and Cylinder Kits for Navistar International[®] DT360 Engines.

Reliance Parts is pleased to announce the availability of inframe and cylinder kits for Navistar International DT360 engine applications. Our cylinder kits contain: piston with pin and retainer, ring set, cylinder liner, and liner o-ring kit. Our inframe kits contain: cylinder kits, main bearing set, connecting rod bearing pairs, cylinder head gasket set and oil pan gasket.

All cylinder liners for Navistar International applications are induction hardened for wear resistance and long engine life. All pistons are high quality aluminum pistons with Ni-resist insert, assuring the best possible operating environment and long life for pistons rings. When it comes to piston rings, all compression rings are Moly coated for maximum wear resistance and long life. Oil control rings are of the highest quality and chrome faced for long life and maximum oil control.
