John Deere 500 Series 6-619 / 6101 Inframe & Overhaul Kits.

Reliance is pleased to re-introduce our new range of 500 Series, John Deere cylinder kits and Overhaul kits. For quite some time we have been working to develop a high quality source for 6-619 and 6101 pistons and we now have them available which enables us to offer the full range of cylinder kits and overhaul kits.

The 6-619 and 6101 litre version were used mainly in articulated four wheel drive farm tractors but were also used in forage harvesters, and the larger construction equipment such as wheel loaders, excavators and crawler tractors. Our current coverage includes the mid and late 6-619 as well as the early and late 6101. The early 6101 is similar to the late 6-619 except for cylinder head components. The late 6101 engines featured a new piston and top liner cooling. Reliance cylinder liners are machined for use in top liner cooled engines. We do not offer kits for the early 6-619, used mainly in 8630 Farm Tractors. Those engines can be upgraded to the later style cylinder kit that we offer for the mid 6-619 Overhaul kits by changing to the later style, tapered connecting rod. All Inframe and Overhaul kits may be ordered with undersized bearings by adding -10, -20, or -30 to the kit part number, indicating the desired bearing sizes.

John Deere 500 Series 6-619 / 6101 Inframe & Overhaul Kits.

Our offering includes:	Part Number	Description	Engine	Serial Number
	NRE-20291	Cylinder Kit	6-619T/A	33,815 - 49,059
	NRE-40476	Cylinder Kit	6-619T/A	49,060 >>
			6101A	>>499,999
	NRE-53215	Cylinder Kit	6101A	500,000>>
	RP230	Inframe Kit	6-619T/A	33,815 - 49,059
